

CCC/CCE certification distinguishes cost and management professionals who have the knowledge and skills that impact the bottom line. AACE certification ensures a high quality standard.

Course Description and Learning Objectives

This course provides an overview of skills and knowledge of cost engineering. The course will cover basic concepts of estimating, planning and scheduling, cost control and forecasting, breakeven analysis, and productivity analysis. Professionals who attend this Review Course will gain a better understanding of some of the basic concepts of cost engineering. This course is for those who plan to take the Certification Exam as it will enable attendees to be better prepared to take the exam beyond what they would likely achieve on their own. Each day's presentation covers subjects that are tested on the Certification Examination.

Course Instructor:

Makarand "Mark" Hastak, Ph.D., CCE

Technical Paper Writing:

Roger Stutz, CCE

AGENDA & Material Outlined @:
